Canada

Country

Canada is situated in the north part of Northern America. It is washed by the Atlantic Ocean, the Pacific Ocean, the Arctic Ocean, the Baffin Bay and the Davis Strait. It borders on the USA in the south and in the north. The population of the country is about 31 million people, 80 per cent of which live in towns and cities in the southern areas. Canada is the second largest country in the world after Russia. The territory of the country includes lots of islands, most known of which is the Canadian Arctic Islands. The capital of Canada is Ottawa.

Population

There are two official languages in Canada: English and French. The last is spoken by 23 per cent of inhabitants. The majority of the people of the French origin live in Quebec, Ontario and New Brunswick. They maintain their own culture and traditions.

Climate

The climate of the country varies from temperate in the south to subarctic and arctic in the north. Canada is geologically active, having many earthquakes and potentially active volcanoes, such as Mount Meager, Mount Garibaldi, Mount Cayley and the Mount Edziza volcanic complex.

System

Canada consists of ten provinces and three territories and is governed as parliamentary democracy and a constitutional monarchy.

An industrial nation

Canada is an industrial nation with a highly developed science and technology sector. It has 18 Nobel Laureates in physics, chemistry and medicine. Canada is also one of the world's largest suppliers of agricultural products such as wheat, canola and other grains. The country is a major source of natural resources: zinc, uranium, gold, aluminium and lead. Among the country's main industries are automobiles and aeronautics, concentrated mostly in Ontario and Quebec.

Conclusion

It is worth saying that Canada is one of the most highly developed and wealthiest countries in the world.
